

TIMBERLANDS
Pacific

Forest Information Specialist

Timberlands Pacific is seeking to appoint a specialist in GIS and stand record databases, to provide GIS training and support to users, maintain stand records and to provide the company with accurate reports on the forest estate.

This role will be based in Launceston, Tasmania, and involves:

- Creating, verifying & updating forest spatial and textual data
- Coordinating forest data acquisition programmes and harvest yield reconciliations
- Providing assistance in the production of forest maps and estate models
- Development and maintenance of forest information systems and procedures
- Providing training and technical support to all users of GIS and forest information systems

Preference will be given to applicants with the following:

- A relevant forestry or similar industry qualification
- Experience with ArcGIS software and GPS surveying
- An interest in programming or modelling
- A strong working knowledge of Excel Access, and Word (MS 2007)
- Good analytical skills and attention to detail
- Good communication and people skills
- Strong time management and leadership skills

If this sounds like an opportunity you would be interested in, please submit a brief application with your CV attached, by email or post to:
